LILAC-days in der 5AB

Group 5A/B enjoyed their three-day-project in English and were – and still are - really enthusiastic about it.

We learnt so much although it was only three days, but it was great fun learning.

I liked the confidence exercises with Tom a lot because this will help me in other situations in my life.

It was pretty much fun to play games, to talk about embarrassing situations, to overcome our shyness, and to talk about America. All in all it was so awesome.

The four teachers were like friends and this I think was the most amazing thing.

It was really great fun to practise public speaking with Tom. I really enjoyed myself and got much more confident.

We were so lucky to have a programme like this. It helped improve our English, learn about foreign countries, other people and their accents. If I mentioned all the things I liked and loved about the project and all the things we learned it would become a book!

The LILAC-days were very good to improve our English, so the money was well invested.
